A New Fountain Pen on a New Principle.

All the faults of other fountain pens overcome. When through writing, the pen-point is drawn into the ink reservoir, which is corked up tight by the safety cap A, so that it can be carried in any position without leaking, while the pen, being immersed in ink, is kept clean and moist; and when opened will write the instant it touches paper. One twist of the wrist opens it for filling; another twist and it's ready to write. No joints to ink the fingers. No threads to get gummed up. Simple in construction, and perfect in operation.

Caw's Safety Fountain Pen is *safe* to buy and *safe* to use. Money refunded if not satisfactory.

CAW'S "EASY" FOUNTAIN PEN.
